

Trusted, Reliable, and Affordable. An Exchange Alternative Designed for Business Users

The MDAEMON® Email Server has been deployed in over 90 countries around the world to meet the needs of small-to-medium businesses that require a reliable and secure mail server without expensive administration or high per-user costs. It simplifies messaging and collaboration requirements with an intuitive, user-friendly design offering enterprise-class features that can be managed with minimal training and support. MDAEMON can be up and running in under 10 minutes. The Windows-based mail server requires almost no maintenance and offers the flexibility of remote administration to make email management simple.

Key Features

- Flexible design using SyncML, IMAP, POP, SMTP, and DomainPOP services. Does not require a Server Operating System.
- Proven security using DKIM, SenderID for authentication and verification, anti-spam engine, Bayesian filtering, SSL/TSL, backscatter protection, and proactive malware prevention (via SecurityPlus plug-in).
- Custom scheduling and mail queuing for more flexible outbound mail management.
- Mobility enabled for use with Windows Mobile®, Palm, Symbian, Apple, or BlackBerry devices.
- Groupware enabled (Mail, Calendar, Contacts, Tasks, Notes, and Journals).
- Secure Instant Messaging application.
- Simplified archiving and rapid failure recovery.
- Multiple domain support and integrated web administration.

The easy-to-use web mail client offers over 25 languages, enabling users to access their email and collaboration features from anywhere.

Key Benefits

Highly Secure. Incorporates multiple layers of security techniques such as Relay Controls, IP Shielding, SMTP Authentication and reverse lookups, to minimize possible server exploits.

Collaboration. Mail, Calendar, Contacts, Tasks, Notes and Journal. Supports Microsoft Outlook® via the Outlook Connector for MDAemon application.

Easy Administration and Maintenance. Intuitive, task-based GUI, easy account database integration (via Active Directory, LDAP, ODBC, or MDAemon's Minger verification), plus simple back-up and restore.

Remote Access. Access email from anywhere using the integrated web mail client or perform remote account management from the administrative application.

Integrated Messaging Client. Provides email and calendar notification with secure Instant Messaging for complete and flexible inter-office communications.

Powerful Mail List Engine. Create and manage bulletins, discussions, and distribution lists easily to effectively communicate on multiple levels.

System Requirements

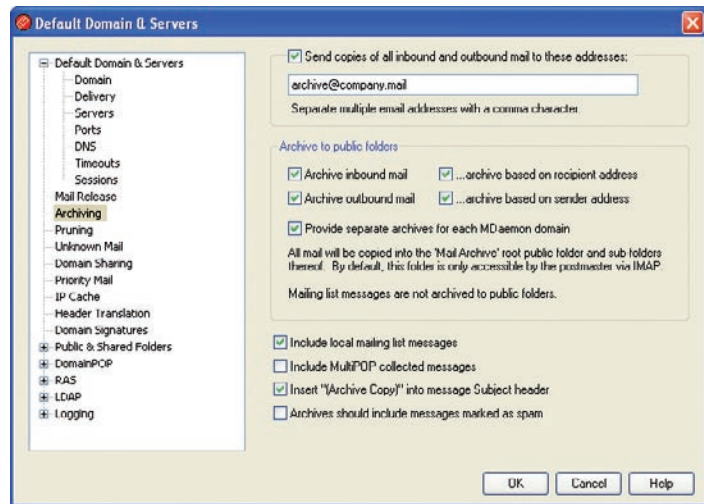

- Computer with Pentium III 500 MHz (or higher) processor (Pentium 4 2.4 GHz or higher recommended)
- 512 MB of memory (1 GB recommended)
- Typical Hard disk space required: 100MB, plus additional space for stored mail
- Microsoft Windows XP/2000/2003/ Vista/2008 (including 64-bit versions)
- Internet Explorer 5.5 or higher
- Ethernet Network Card
- TCP/IP network protocol installed
- Internet or Intranet communication capabilities.
